Shareholders and Readers are cautioned that in the case of data and information external to the Company, though the same are based on sources believed to be reliable, no representation is made on its accuracy or comprehensiveness. Further, though utmost care has been taken to ensure that the opinions expressed by the therein contain its perceptions on most of the important trends having a material impact on the Company's operations.

The opinions expressed by the management may contain certain forward-looking statements in the current scenario, which is extremely dynamic, and increasingly fraught with risk and uncertainties. The Company undertakes no obligation to publicly update or revise any of the opinions or forward-looking statements expressed in this report, consequent to new information, future events, or otherwise.

# BACKGROUND

The data of the current accounting year is for 12 months. The year started with the backdrop of the markets recovering from the slow-down. The Company has started to increase presence in the Automotive and silicon based thermoplastics segment, which is a growing market in India. The Company has prioritized its focus on Siliconenhanced products and targeted to find new markets for this product in India. Thermoplastic Elastomers sales in India continued to grow at a steady rate. We managed to hold our margins in an increasingly competitive market through innovative products.

# OVERVIEW

It has been recognized world over that India is one of the fastest growing economies. The relevant markets for Multibase are growing at decent pace and we expect that the Company will benefit from this. The business prospects for the Company are good with increased volumes in these market segments. Increased competition and uncertainty in the world petrochemical markets could put some pressure on margins, since there could be the double effect of raw material price rises as well as pressure from competition. Company produces a range of both commodity and specialty products which are used in a wide range of applications in markets such as Automotive, Personal Care, Personal hygiene, Stationery, Telecommunications etc. The Company is continuously doing research and development work at the modern R & D plant in Daman which yields a continuous flow of new generation products on a regular basis.

# **RISKS AND CONCERNS**

The threats faced by your Company in achieving its future targets may be due to pressure on pricing due to severe competition and aggressive posturing by competition; both domestic and local. This may affect the margins to an extent. In addition, the uncertainty in the global political, economic and stock market scenarios affected the cost of the raw materials used by the Company. We expect our eminent position as the number one supplier of these products due to our ability in identifying and meeting the customers' expectation in terms of quality, fast reaction time, new developments etc.

The Risk, which the Indian Plastics Industry foresees are possible slow down of Indian and global economy, myths and misconceptions about plastics and its impact on environment and increased competition from the foreign manufactures. The other risk which prevails in the industry are high fluctuations in the prices of raw materials, technology obsolescence and competition from the global players.

The Company being a part of Dow Corning Corporation, has always come out with positive mitigations against such risks and has been successful in maintaining its leadership position.

These controls are periodically updated and are subject to review by internal auditors.
