## MANAGEMENT DISCUSSION AND ANALYSIS

### CAVEAT

This section of the Annual Report has been included in adherence to the spirit enunciated in the Code of Corporate Governance approved by the Securities and Exchange Board of India. Shareholders and Readers are cautioned that in the case of data and information external to the Company, though the same are based on sources believed to be reliable, no representation is made on its accuracy or comprehensiveness. Further, utmost care has been taken to ensure that the opinion expressed therein contain its perceptions on most of the important trends having a material impact on the Company's operations.

The opinions expressed by the management may contain certain forward-looking statements in the current scenario, which is extremely dynamic and increasingly fraught with risk and uncertainties. The Company undertakes no obligation to publicly update or revise any of the opinions or forward-looking statements expressed in this report, consequent to new information, future events, or otherwise. Estimation and expectation made in the Report may differ from actual performance due to various Economic conditions, Government Policies and other related factors.

### BACKGROUND & INDUSTRY OUTLOOK

Year under review started with the backdrop of the markets recovering from the slow-down. The Company increased its presence in the Automotive (safety and non-safety products) and Silicon based thermoplastics segment. The Company prioritized its focus on Silicon-enhanced products and identified new opportunities in new markets and applications. Thermoplastic Elastomers sales in India continued to grow at a steady rate by converting some of the non TPE applications to TPE. The company managed to hold the margins in an increasingly competitive market and during the global economy slowdown through a mix of innovative products, selective price increase and qualifying alternate raw materials.

### OVERVIEW

It has been recognized world over that India is one of the fastest growing economies. The relevant markets for Multibase are growing steadily and we expect that the Company will benefit from this. The business prospects for the Company are good with increased volumes in these market segments. Increased competition and uncertainty in the world petrochemical markets could put some pressure on margins, since there could be the double effect of raw material price rises as well as pressure from competition. Company produces a range of both commodity and specialty products which are used in a wide range of applications in markets such as Automotive, Personal Care, Personal hygiene, Stationery, Telecommunications and Engineering Polymers etc. The Company continuously develops new generation products through its modern R & D plant in Daman to stay ahead of the competition. Global grades are now being produced in Daman to address the requirement of Automotive sector.

### FINANCIAL REVIEW

The overall performance of the Company for the current financial year improved as compared to previous financial

year in spite of various challenges faced during the year such as high inflation and increase of prices of imported raw materials and commodities globally. During the year under review, the Company reported gross revenue from operations of ₹ 9, 648.67 lac as against ₹ 7,824.12 lac during the FY 2015-16. The Company reported Profit Before Tax of ₹ 2,032.86 Lac and Profit After Tax of ₹ 1,329.95 as against ₹ 1,512.19 Lac and ₹ 987.69 Lac respectively for the previous Financial Year.

### RISKS AND CONCERNS

The Company being a part of Dow Corning Corporation, has always come out with positive mitigations against such risks and has been successful in maintaining its leadership position.

However the threats faced by your Company in achieving its future targets may be due to pressure on pricing due to severe competition and aggressive posturing by competition; both domestic and international. This may affect the margins to an extent. In addition, the uncertainty in the global political, economic and stock market scenarios affected the cost of the raw materials used by the Company. We expect our eminent position as the leading supplier of these products due to our ability in identifying and meeting the customers' expectation in terms of quality, fast reaction time, new developments etc.

The Risk, which the Indian Plastics Industry foresees are possible slowdown of Indian and global economy, myths and misconceptions about plastics and its impact on environment and increased competition from the foreign manufactures. The other risk which prevails in the industry are high fluctuations in the prices of raw materials, technology obsolescence and competition from the global players.

### HUMAN RESOURCES AND INDUSTRIAL RELATIONS

The Industrial relations with workmen during the year were normal. The Directors place on record their appreciation for the sincere and efficient services rendered by the executives, staff and workmen of the Company and are confident that they will continue to the Company's prosperity and growth.

### INTERNAL CONTROL SYSTEMS

The Company has put in place adequate system of internal control measures in all risk areas, implemented by the management towards achieving efficiency in operations, optimum utilization of resources and effective monitoring thereof and compliance with applicable laws.

The directors had laid down internal financial controls to be followed by the company and that such internal financial controls are adequate and were operating effectively.

These measures are in the form of procedures/ processes set by the management covering all critical and important areas. These controls are periodically updated and are subject to review by internal auditors. Internal audit function has been outsourced to independent firm of Chartered Accountants who submit quarterly reports to the Board. The Audit Committee of Directors reviews the report of the Internal Auditors and recommends steps to be taken to tighten up internal controls.

### Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the

## SIGNIFICANT ACCOUNTING POLICIES & NOTES FORMING PART OF THE FINANCIAL STATEMENTS

### 23. Corporate Information

Multibase India Limited is engaged in manufacturing and selling of Polypropylene Compound, Thermoplastic Elastomer, Silicon Master Batch and Thermoplastic Master Batch.

### 24. Significant accounting policies

#### (a) Basis of accounting and preparation of financial statement

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, and the relevant provisions of the Companies Act, 2013 ("the 2013 Act"). The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

#### (b) Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

#### (c) Fixed assets

Fixed assets are carried at cost less accumulated depreciation / amortisation and impairment losses, if any. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses.

#### (d) Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost. Depreciation on tangible and intangible fixed assets has been provided on the straight line method as per the useful life prescribed in Schedule II to the Companies Act, 2013. Depreciation is provided at 100% on items of Fixed Assets costing less than ₹ 5,000/-

#### (e) Inventory

Inventories are valued at the lower of cost calculated on moving average basis and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies and receiving charges. Finished goods include appropriate proportion of overheads and, where applicable, excise duty.

#### (f) Foreign currency transactions

Liabilities and Assets arising due to transactions in foreign currency are recorded at the average rates of exchange in force for the month in which the transactions are effected. Exchange differences arising on realisation of/ payment against the Assets and Liabilities denominated in foreign currency is accounted for as income/expenditure at the rate of exchange prevailing on the date of settlement. At the year end, monetary items denominated in foreign currency are reported using the closing rates of exchange. Exchange differences arising on such restatement are accounted as income/expenditure.

#### (g) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

##### **Sale of goods**

Sales are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer. Sales include excise duty but exclude sales tax and value added tax.

## Annual Report 2016-2017 .....

### **Other income**

#### Interest

Interest income is recognised accrual basis.

### **(h) Employee benefits**

Employee benefits include provident fund, gratuity fund and compensated absences.

#### **(i) Defined contribution plans**

The Company's contribution to provident fund is considered as defined contribution plan and is charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees.

#### **(ii) Defined benefit plans - Gratuity**

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost.

#### **(iii) Defined benefit plans - Leave encashment**

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

### **(i) Income taxes**

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws. Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

### **(j) Provisions, contingent liabilities and contingent assets**

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources. Contingent liabilities are not recognised but are disclosed in notes. Contingent assets are neither recognised nor disclosed in the financial statements.

### **(k) Impairment of assets**

The carrying amounts of assets are reviewed at each balance sheet date for any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

### **(m) Cash and cash equivalents (for purposes of Cash Flow Statement)**

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

**(n) Earnings per share**

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for the effects of dividend, interest and other charges relating to the dilutive potential equity shares by weighted average number of equity shares plus dilutive potential equity shares.

**(o) Operating Cycle**

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

**25. Contingent liabilities:**
